SUMMARY OF INFORMATION

During this session, I could see a long, slender tubular object. The object was shiny. The object was pointed at one end. The object had several attachments on it. The object was mechanical. At times, it seemed that one portion of the object could open. At this time, the object becomes sharp and bites down.

I could see people at the overall site. They were walking in a line downhill. They were dressed casual. I could also see children at the site.
